Hiring Manager
Jane Street
250 Vesey Street
New York, NY 10281

Dear Hiring Manager,

I am writing to express my interest in the Software Engineer Internship at Jane Street which I learned about through a friend at my university. I am a junior pursuing a Bachelor of Science in Computer Science and a minor in Mathematics at Emory University.

Currently, I am working as a Technical Research Intern as a part of the National Science Foundation's Research Experiences for Undergraduates program. During this experience, I have learned to collaborate with students of varying magnitudes of experiences and work hands-on with technologies at the forefront of the Computer Science field. I am continuously being exposed to new ideas and code that I have to understand, utilize, and adapt to research goals.

Simultaneously, I am working on a project with the Carlos Museum on campus to train recent artificial intelligence models to solve complex problems like detecting language biases and replacing them for inclusivity and diversity goals. I have also gained valuable project management and user interface design skills through my role as an iOS App Development Intern at U.S.A. Boccia where I worked on planning, designing, and developing an app to be used in nationwide Boccia games.

A career at Jane Street is desirable for me due to its leadership in quantitative trading. Jane Street not only builds mathematical technologies to optimize trading in financial markets but also goes the extra mile by responsibly managing risks and making sure that its employees can collaborate freely and state their own opinions. I believe that Computer Science is inherently multidisciplinary and Jane Street parallels that by developing technologies for success in rapidly changing financial markets by promoting collaboration of different ideas and ideologies.

I am excited to contribute to and learn as much as possible from this internship. I hope to discuss this opportunity with you in more detail soon. Thank you for your time and consideration.

Sincerely,
