Hiring Manager
Fetch Package, Inc.
1705 Guadalupe St Ste 300
Austin, TX 78701-1273

Dear Hiring Manager,

I am writing to express my interest in the iOS Engineer Apprenticeship at Fetch. I am a junior pursuing a degree in Computer Science and a minor in Mathematics at Emory University.

Last semester, I worked at USA Boccia as an iOS App Development Intern. In this role I was tasked to develop a match-keeping app for iPad from scratch given only designs of the desired app. Using this skeleton, in a group of two, I employed my active learning skills to learn Swift and Objective-C while, simultaneously, building the app. Although I already had User Experience Design skills from previous coursework, these skills were enhanced as I provided suggestions in design meetings to make the app interface more modern yet intuitive to support new users. After planning and designing we developed a finished app to be used in nationwide paralympic Boccia games organized by USA Boccia.

Currently, I am working as a Technical Research Intern as a part of the NSF's REU program. During this experience, I have collaborated with different students to work hands-on with the latest technologies. I am continuously being exposed to new ideas and code that I have to understand, utilize, and adapt to research goals. Simultaneously, I am working on a project with the Carlos Museum on campus to train recent artificial intelligence models to solve ethically complex problems like detecting language biases and replacing them for inclusivity goals.

A career at Fetch is desirable for me due to its unique service that was built to intuitively solve the problem of package thefts, increasing package security and accountability for apartment communities. Computer Science is inherently multidisciplinary and so its applications, especially in software development, at their core should be solution-oriented to create intuitive solutions; Fetch achieves this with their service and app. Additionally, these intuitive solutions can only be created through collaboration between people of different backgrounds, academic and social, which reflect Fetch's work culture. So I believe that my creative problem-solving skills and communicative teamwork capabilities make me a good fit for this role and a career at Fetch.

Thank you for your time and consideration. I look forward to speaking with you in detail soon.

Sincerely,

Raasikh Kanjiani
