Hiring Manager  
FOX Corporation  
2010 E Centennial Cir  
Tempe, AZ 85284

Dear Hiring Manager,

I am writing to express interest in the Summer 2025 FOX Technology Internship Program. I am a junior pursuing a BSc in Computer Science and a minor in Mathematics at Emory University, looking for an internship where I can contribute to important projects and improve my skills.

Currently, I am a Technical Research Intern as a part of the National Science Foundation's REU program at Emory. During this experience, I have collaborated with diverse students to work with the latest technologies. Continuous exposure to new ideas and technologies—that I have to understand, utilize, and adapt to research goals—has made me adaptable and a fast-learner. In addition, my experience developing an AI-based language bias pruner for the Michael C. Carlos Museum over the summer gave me experience with applications of technology and all phases of the Software Development Life Cycle.

Additionally, last semester, I worked at USA Boccia as an iOS App Development Intern where I employed my time management and active learning skills to learn Swift while developing a match-keeping app for a para sport called Boccia. By learning the specifications of the app I also got experience with the sports industry, relevant to FOX's industry. I delivered a modern interface to speed up volunteer onboarding and increase accessibility for participants at nationwide Boccia games and tournaments.

Through these applied experiences I have had one key takeaway: creativity and proactivity are more important than raw skills, especially in, seemingly rigid, technical settings where innovation roots from novel approaches. I appreciate that this idea has been echoed through the job description and FOX's career website. In addition, the intersection of entertainment and technology at FOX parallels my interdisciplinary experiences. I look forward to learning more about the entertainment world while creatively engineering software and developing AI based solutions for audience-focused, business-critical projects. Additionally, solutions developed by the FOX Tech Team like automated behavior tagging (similar to my artifact bias tagging project at the museum) and performance improvement for FOX's iOS app excite me, promising a culture of innovation; focus on continued improvement and growth also shows a culture of continued improvement and growth which are likable qualities for me.

Thank you for your time and consideration. I look forward to speaking with you in detail soon.

Sincerely,

A handwritten signature in black ink, appearing to read 'Raasikh Kanjiani', with a stylized flourish at the end.
