Hiring Manager
Point72
72 Cummings Point Rd
Stamford, CT 06902

Dear Hiring Manager,

I am writing to express my interest in the Quantitative Developer Internship at Point72 which I learned about through a student organization at my University. I am a junior pursuing a Bachelor of Science in Computer Science and a minor in Mathematics at Emory University.

Currently, I am working as a Technical Research Intern as a part of the National Science Foundation's Research Experiences for Undergraduates program. During this experience, I have learned to collaborate with students of varying magnitudes of experiences and work hands-on with technologies at the forefront of the Computer Science field. I am continuously being exposed to new ideas and code that I have to understand, utilize, and adapt to research goals.

Simultaneously, I am working on a project with the Carlos Museum on campus to train recent artificial intelligence models to solve complex problems like detecting language biases and replacing them for inclusivity and diversity goals. I have also gained valuable project management and user interface design skills through my role as an iOS App Development Intern at U.S.A. Boccia where I worked on planning, designing, and developing an app to be used in nationwide Boccia games.

I am particularly drawn to a career at Point72 due to its prominent work in asset management. Point72 not only builds computer-driven trading strategies, but also partakes in rigorous research to ensure optimal investing in varied assets. I deeply admire Point72's continued connection with academic communities which places it at the frontier of the latest financial technology. I believe that my attention to detail, analytical skills, and communicative attitude align closely with the company's culture and its goal of developing new innovative insights into the latest market data.

I am excited to contribute to and learn as much as possible from this experience. I hope to discuss this opportunity with you in more detail soon. Thank you for your time and consideration.

Sincerely,
