Hiring Manager
General Mills
1 General Mills Blvd
Minneapolis, MN 55426

Dear Hiring Manager,

I am writing to express my interest in the Digital and Technology Internship position at General Mills as advertised on Handshake and the "You Are Here" event. I am a junior pursuing a bachelor's degree in Computer Science and a minor in Mathematics at Emory University.

Currently, I am working as a Technical Research Intern under the National Science Foundation's Research Experiences for Undergraduates program. During this experience, I have learned to collaborate with students of varying magnitudes of experiences and work hands-on with technologies at the forefront of the Computer Science field. I am continuously being exposed to new ideas and code that I have to understand, utilize, and adapt to research goals.

Simultaneously, I am working on a project with the Carlos Museum on campus to train recent artificial intelligence models to solve complex problems like detecting language biases and replacing them for inclusivity and diversity goals. I have also gained valuable project management and user interface design skills through my role as an iOS App Development Intern at U.S.A. Boccia where I worked on planning, designing, and developing an app to be used in nationwide Boccia games.

I am particularly drawn to General Mills due to its prominent position in the food industry. Not only does General Mills produce high-quality food, but it also commits to transparency about its ingredients and offers healthy alternatives with customers' needs in mind. I believe that my attention to detail, ability to take smart risks, and friendly attitude align closely with the company's culture and product goals.

I am excited to contribute to and learn as much as possible from this experience. I hope to discuss this opportunity with you in more detail soon. Thank you for your time and consideration.

Sincerely,

Raasikh Kanjiani
